Westermeyer Industries Offers Centrifugal Oil Separators

Bluffs, Illinois—Westermeyer Industries is proud to announce that it now supplies centrifugal oil separators. These centrifugal oil separators are designed to remove high quantities of oil at a wide range of operating capacities. Westermeyer Industries oil separators are priced competitively and delivered on time.

Field tests have shown our centrifugal oil separators to be up to 99% effective, even in high oil loading conditions. Both sealed units and serviceable styles are available.

Oil separators should be selected based on the tonnage of the system under normal operating conditions. These conditions are defined by the capacity (or BTUs) of the compressor as determined by the refrigerant gas and saturated suction and condensing temperatures of the operating system. For optimum sizing, select an oil separator with the nearest capacity to the systems load at the evaporating temperature.

To learn more about Westermeyer Industries centrifugal oil separators, view our online catalog at www.westermeyerind.com/catalog.htm or call us at 217.754.3277.

Westermeyer Industries engineers, manufactures, and distributes high-quality components and accessories. Westermeyer Industries services include product design, prototype building, testing, and manufacturing of components for air conditioning and refrigeration industries worldwide.
