Westermeyer Industries begins supplying three-way valves

Bluffs, Illinois—Westermeyer Industries is happy to announce that it is offering three-way valves to the air conditioning and refrigeration industry.

Made of nickel plated steel and incorporating corrosion protection, all Westermeyer Industries valves are designed to handle a minimum of 500 psig and can be rated up to 1000 psig, if necessary. Three-way valve temperature ratings range from -20°F to 300°F, making them suitable for refrigerants and other industrial fluids not corrosive to brass and steel.

As a part of their three-way valve product line, the company offers a swivel valve style. The swivel valve style does not use the normal pipe thread connection, thereby eliminating a potential leak site.

All Westermeyer Industries valves are priced competitively and delivered on time. To learn more about Westermeyer Industries three-way valves, view our online catalog at www.westermeyerind.com/catalog.htm or call us at 217.754.3277.

Westermeyer Industries engineers, manufactures, and distributes high-quality components and accessories. Westermeyer Industries services include product design, prototype building, testing, and manufacturing of components for air conditioning and refrigeration industries worldwide.
