Westermeyer Industries produces optical liquid level switches

Bluffs, Illinois—Westermeyer Industries announced today that it has begun supplying optical liquid level switches. Incorporating a forward-thinking design, Westermeyer Industries optical switches use flat glass. Flat glass

- eliminates contamination problems associated with the 90 degree cone normally used in these types of switches, and
- provides a more reliable product.

These UL recognized optical switches boast full-line voltage capabilities and can operate at a .25 or .5 amp load, eliminating the need for step down transformers. The switch is also available with an optional clip-style junction box attached. The junction box option reduces the work required during switch installation. The switches are provided with pipe threads or SAE o-ring seal configurations.

To learn more about Westermeyer Industries optical liquid level switches view our online catalog at www.westermeyerind.com/catalog.htm or call us at 217.754-3277.

Westermeyer Industries engineers, manufactures, and distributes high-quality components and accessories. Westermeyer Industries services include product design, prototype building, testing, and manufacturing of components for air conditioning and refrigeration industries worldwide.
