Westermeyer Industries Receives ASME Certification

Bluffs, Illinois—Westermeyer Industries announced that it is now an ASME certified pressure vessel code facility. It has the ability to manufacture tanks with either the “U” or “UM” stamp. The company manufactures sizes ranging from 6-5/8” OD through 24” OD and includes vessels up to 2,000 lbs in weight. “We are excited to add the ASME pressure vessels to our product family. At this point, we are open to considering other lengths and sizes as we grow this segment of the business,” said Gary Westermeyer, company president.

In January 2006 Westermeyer Industries began production of ASME accumulators and receivers and is ready to produce other custom ASME vessels.

The ASME certification links Westermeyer Industries with more than 120,000 other professionals in an organization focused on technical, educational, and research issues of the worldwide engineering and technology community. Additionally, the certification demonstrates the company’s commitment to providing quality products and services that comply with the ASME Boiler and Pressure Vessel Code.

Westermeyer Industries engineers, manufactures, and distributes high-quality components and accessories. Westermeyer Industries services include product design, prototype building, testing, and manufacturing of components for air conditioning and refrigeration industries worldwide.
