**Westermeyer Industries Adds a New Level Switch
for High Pressure Applications to its Product Lineup**

BLUFFS, Ill.— In response to the growing demand for high pressure components in the commercial refrigeration and air conditioning industries, Westermeyer Industries has added a new liquid level switch that is rated for 1000 psi and can sense CO₂ levels at -40 F.

The UL recognized liquid level switch is a highly reliable method of optically detecting fluid levels. The hermetically sealed sight glass provides high working pressures without leakage.

Solid state construction ensures many years of trouble-free operation. The body of the switch is made of 1-1/8" hex nickel plated steel. The switch is rated at over one million cycles and is also suitable for refrigerants and other industrial fluids non-corrosive to steel and glass.

To learn more about Westermeyer Industries liquid level switches, view the company's online catalog at www.westermeyerind.com/ or call 217.754.3277.

Westermeyer Industries designs, manufactures, and distributes high-quality commercial components and accessories for the air conditioning and refrigeration industries. More than just a supplier, the company strives to be a component and accessory problem-solver. This "can-do" attitude permeates all Westermeyer Industries projects and is continually demonstrated through the company's commitment to engineering creativity and design ingenuity.
