Westermeyer Industries Introduces line of four oil filters

Bluffs, Illinois—Westermeyer Industries is pleased to announce that it now offers a line of four low cost, high quality oil filters to the air conditioning and refrigeration industry.

Westermeyer Industries oil filters are low pressure drop filters that boast a 99.5 percent efficiency at removing particulates of four microns or larger. All filters offer 330 square inches of filtering surface area, a welded and brazed design for enhanced strength, and a powder paint finish. The filters have a maximum working pressure of 450 psig and are suitable for use with all oil types and halocarbon refrigerants. Both 3/8" flare and 3/4" - 16 spud connection types are available.

The F3-01 and F3-02 model filters use eight cubic inches of XH-9 desiccant material to remove moisture from the system.

To learn more about Westermeyer Industries oil filters, view our online catalog at www.westermeyerind.com/catalog.htm or call us at 217.754.3277.

Westermeyer Industries engineers, manufactures, and distributes high-quality components and accessories. Westermeyer Industries services include product design, prototype building, testing, and manufacturing of components for air conditioning and refrigeration industries worldwide.
