Westermeyer Industries Expands Manufacturing Facility

Bluffs, Illinois—Westermeyer Industries announced plans for phase two of its manufacturing facility expansion in central Illinois.

Phase one of the company's expansion plan was completed last February and added 4,000 square feet of new construction. The second phase will add another 20,000 square feet to the facility. Completion of phase two is set for the summer of 2006.

An expanded product line that includes ASME products and high pressure liquid receivers along with an increase in production have placed Westermeyer Industries in need of additional space.

Westermeyer Industries' Bluffs facility houses a variety of metal working processes to fabricate components for the air conditioning and refrigeration markets. The company also provides custom powder painting.

Westermeyer Industries engineers, manufactures, and distributes high-quality components and accessories. Westermeyer Industries services include product design, prototype building, testing, and manufacturing of components for air conditioning and refrigeration industries worldwide.
