**Westermeyer Industries New Manufacturing Facility Online**

Bluffs, Illinois—Westermeyer Industries announced today the opening of its new air conditioning and refrigeration components manufacturing facility in central Illinois.

The 10,000 square foot facility is located on five acres in Bluffs, Illinois. The facility houses a variety of metal working processes to fabricate components such as oil reservoirs, oil regulators, oil separators, refrigerant receivers, oil filters, liquid level switches, y strainers, three-way valves, and rupture discs for the air conditioning and refrigeration markets.

The company also provides custom powder painting. The new powder coat system is capable of painting components with a maximum size of eight feet wide by seven feet high by 18 feet long (8' wide x 7' high x 18' long).

“Today is an exciting and important day for our company,” said Gary Westermeyer, President, Westermeyer Industries. With our new facility complete we are now better positioned to manufacture quality components, delivered on time, that are priced competitively.”

Westermeyer Industries engineers, manufactures, and distributes high-quality components and accessories. Westermeyer Industries services include product design, prototype building, testing, and manufacturing of components for air conditioning and refrigeration industries worldwide.
