

**October 20, 2022**

Dear Valued Customer,

This letter is to notify you that effective immediately Westermeyer Industries will not be supplying threaded fusible plugs installed on ASME vessels – effective immediately. This is a result of an ASME code requirement (BPVC.XIII-2021) that prohibits the use of these devices and deems fusible plugs as an inadequate relief device. Where applicable, we will continue to supply the connections to accept your preferred relief device per ASME code. If you need support sourcing pressure relief valves, we would be happy to assist.

A Sales Representative will be in contact with you to discuss the impacts to your product portfolio. Should you have any questions, please do not hesitate to contact me and I will be glad to help.

Best Regards,

A handwritten signature in black ink that reads 'Adam Chapman'.
